

## Carl David Buena BSIT 3

# Part 1: Create a Repository

1. Log in to GitHub.
2. Click **New repository**.
3. Repository name:
4. Check ☒ **Add a README file**.
5. Click **Create repository**.

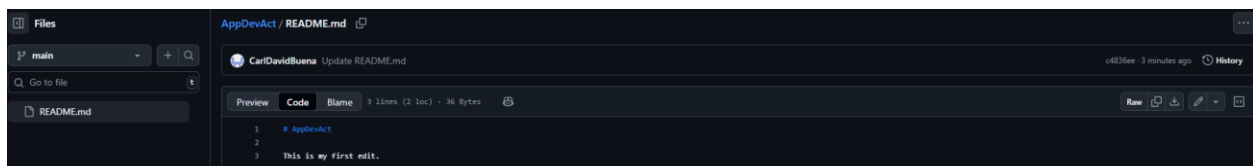

👉 First commit is created automatically with the message: **Initial commit**.

# Part 2: First Edit (Add a Line)

1. Open the file `README.md`.
2. Click the  **edit button**.
3. Add this line at the bottom:  

```
This is my first edit.
```
4. Look at the diff preview:
  - What color is shown for the new line? Blue
5. Commit message: Update README.md
6. Click **Commit changes**.

## Part 3: Second Edit (Change a Line)

1. Edit README.md again.

2. Change the text:

This is my first edit.

→

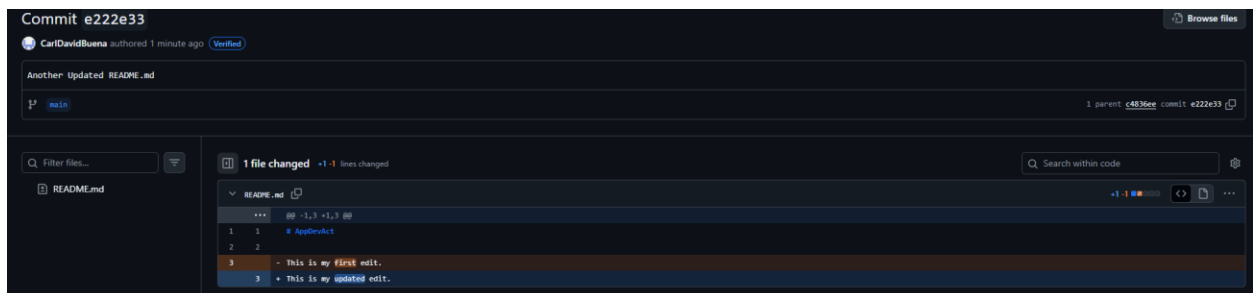

This is my updated edit.

3. Look at the diff preview:

- What color is used for the removed line? Red
- What color is used for the new line? Blue

4. Commit message: Another Updated README.md

5. Commit changes.

## Part 4: Third Edit (Remove a Line)

1. Edit `README.md` again.

2. Delete the line:

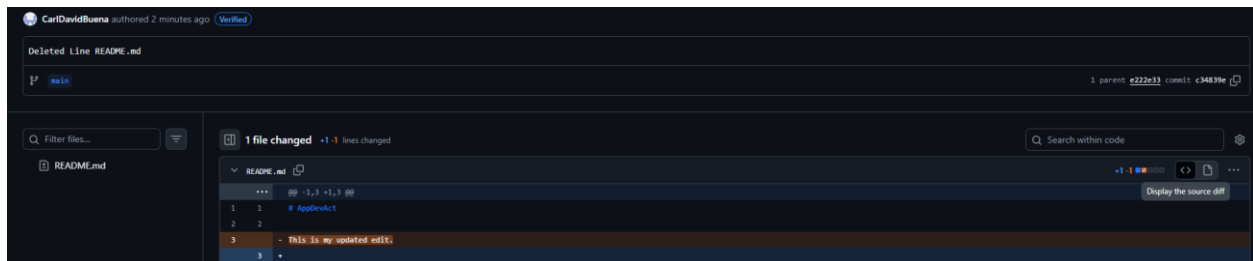

`This is my updated edit.`

3. Look at the diff preview:

- What color is shown for the deleted line? Red

4. Commit message: Deleted Line README.md

5. Commit changes.

## Part 5: View Commit History

1. At the top of your repository, click **Commits**.

2. How many commits do you see? I see 4 commits.

3. Write the messages of your commits here:

- Initial Commit
- Update README.md
- Another Updated README.md
- Deleted Line README.md
